

**Fallopian tubes**

**Ovaries**

**Vagina**

**Uterus or womb**

**Cervix**

# My Body

## Vagina

The tube between your uterus and the outside of your body.

You can see the beginning of it between your legs.

## Cervix

It is at the top of your vagina.

It is very narrow to protect your uterus from the outside.

## Uterus or womb

It is above your vagina inside your body.

It is where a baby will grow if you are pregnant.

## Ovaries

You have 2 ovaries.

They are on either side of your uterus inside your body.

Your ovaries send 1 egg every month to your uterus.

The egg is so small you cannot see or feel it.

## Fallopian tubes

The tubes between your ovaries and your uterus.

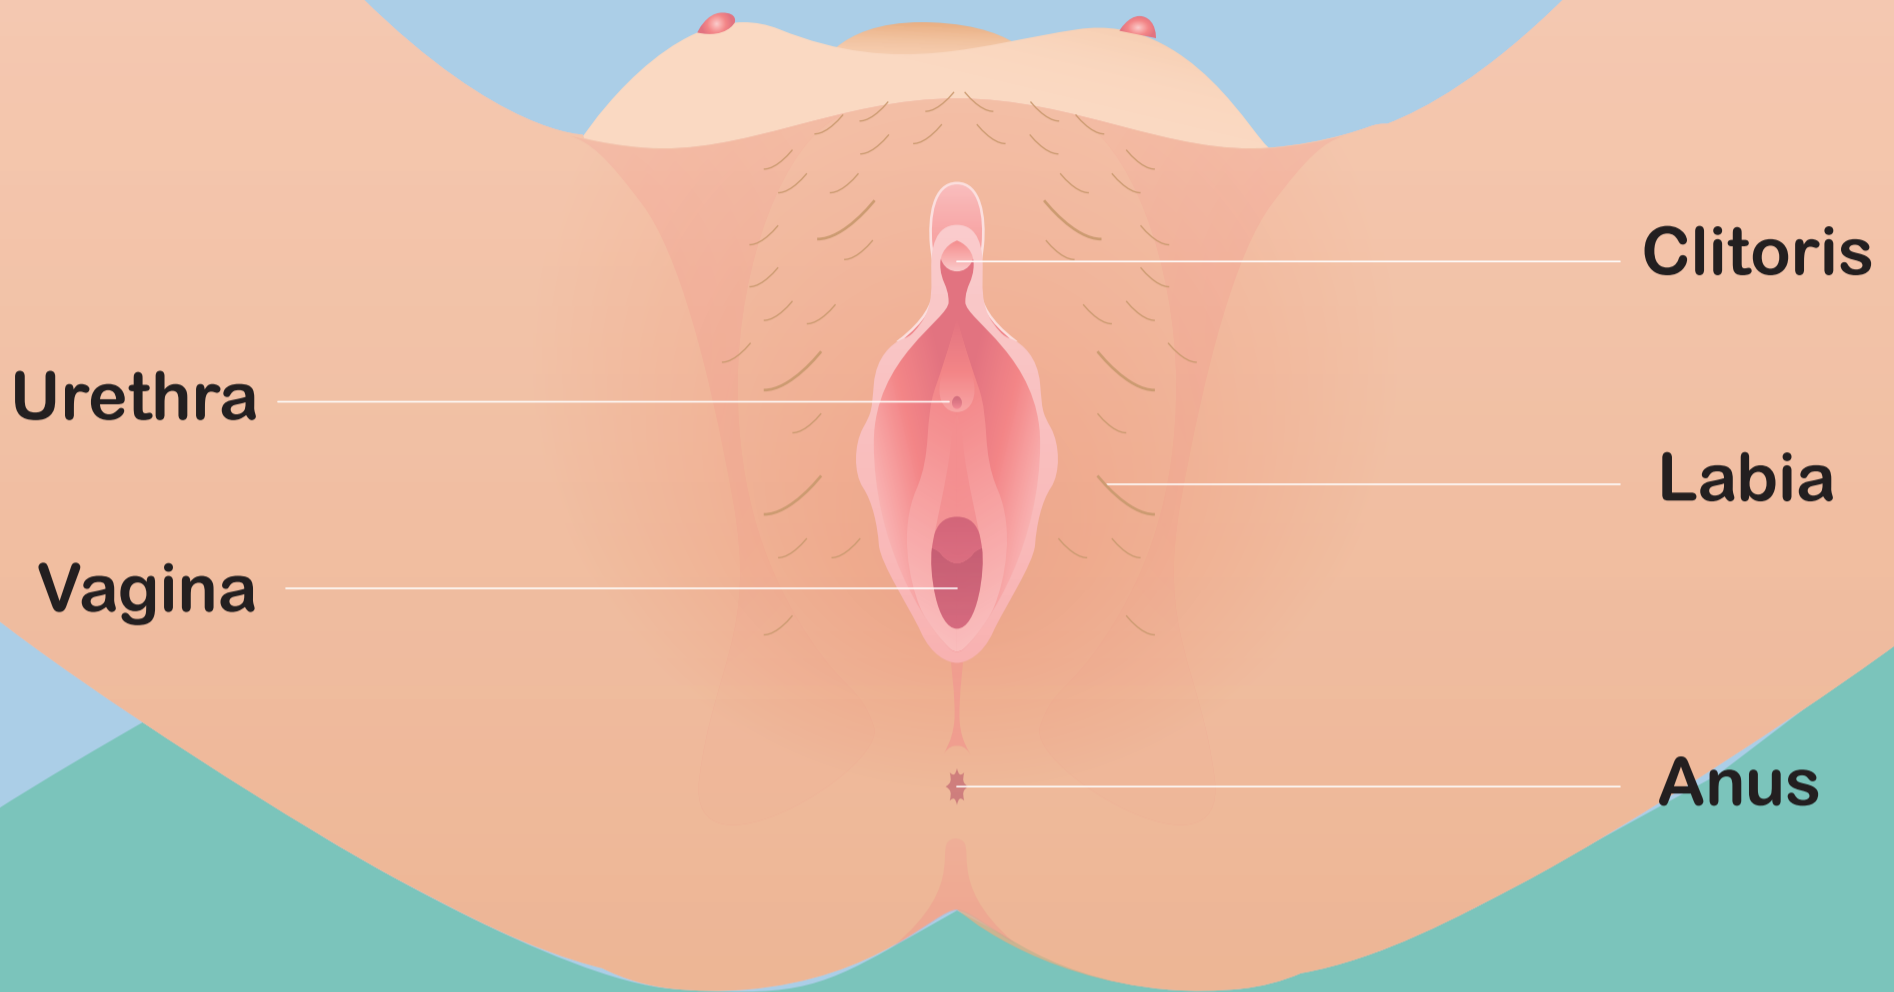

They bring an egg every month to your uterus.

The egg is so small you cannot see it.

# My Vulva

## Vulva

The outside area of your vagina.

It includes everything you can see between your legs.

## Vagina

The tube between your uterus and the outside of your body.

You can see the beginning of it between your legs.

## Urethra

Where your wee comes out.

## Anus

Where your poo comes out.

## Clitoris

A small bump at the top of your vulva.

Touching your clitoris can feel good in a sexy way.

This feeling is also called pleasure.

## Labia

The skin that covers your vagina.

Some people call them lips or flaps.
